

INSTRUCTIONS FOR USE

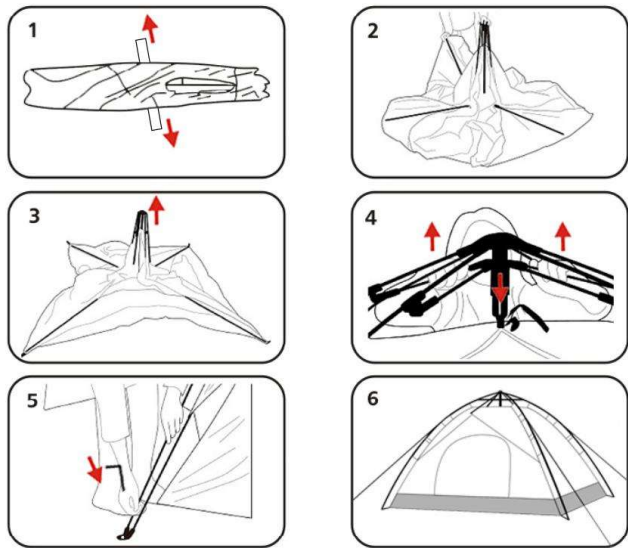

Tent storage method

1. Remove the fixed floor nails and windbreak ropes;
2. Collect the top two layers of components to lower the tent.
3. The connection of the four-corner connecting rod is slightly pulled out in the opposite direction and folded in half;
4. After the connecting rod is folded in half, fold the tent to the center;
5. Bring the four corners to the center of the connector and roll it into a column.
6. Put the accessories into a small bag, and put them into the storage bag together after the tent is tied.

How to build a tent

1. Take out the tent from the storage bag and untie the straps;
2. Turn the top components of the tent up and unfold the four corners;
3. Lift the top component of the tent up and let the tent unfold automatically;
4. Press down the support rod layer below the component to fully open the tent.
5. Stretch the four corners to the maximum extent and insert and fix them with floor nails.
6. Select windbreak rope reinforcement as appropriate to complete the tent construction.
